Product description

Looking for an intuitive, easy-to-use vacuum controller? VACUUBRAND has introduced the VACUU-SELECT controller - an application-based controller with a touch screen display for all of your lab-scale vacuum processes. The VACUU-SELECT controller has you covered. Use manual set-point-control for simple processes, run fully automated distillations or create your own application with simple drag-and-drop editing. To use predefined applications, simply select your application and press start. The controller independently manages the vacuum process to completion. For solvent evaporation, the VACUU-SELECT controller detects boiling points and adjusts the vacuum process as necessary. You can virtually forget about the vacuum process and devote your attention to other tasks. The VACUU-SELECT controller is an easy-to-use, efficient controller for your lab.
